

The enjoyment of beauty has a peculiar, mildly intoxicating quality of feeling...The science of aesthetics investigates the conditions under which things are felt as beautiful, but it has been unable to give any explanation of the nature and origin of beauty...Psychoanalysis, unfortunately, has scarcely anything to say about beauty either.

(Sigmund Freud, 'Civilization and its discontents' (1930), Civilization, Society and Religion: Group Psychology, Civilization and its Discontents and Other Works, trans. James Strachey (Harmondsworth: Penguin, 1985), pp. 270-71.)
